PDCA Showmanship Evaluation Card (Revised 2016)

It is important that participants in showmanship ensure that their animal is in proper body condition and growth based on the age of the animal. Horns are to be removed at an appropriate age to provide a safer environment for the leadsperson. Feet should be properly trimmed to promote ease of movement for the animal. These practices will show good husbandry skills of the participant as well as a positive image for the dairy industry.

PDCA recommends the following levels of discrimination in the judging of showmanship competitions.
